

CUT SECTION OF STEERING SYSTEM

MODEL: CUT11

FEATURES

- Colour-coded system for better understanding
- Stand mounted for better ergonomics

DESCRIPTION

Our models facilitate thorough understanding because they are actual systems, apart from being life-sized. All details of construction and working of every component are clearly exposed. Different working systems are coloured differently to make learning easier.

Steering Gear Box with Wheel And Axle is suitably sectioned to demonstrate the working of Steering wheel worms, steering arm. The Arrangement of Wheels and Axle connecting to the steering system is done so the movement of the wheels when rotating the steering wheels can be displayed.

The cut section is so taken as to expose internal working parts.

TYPES

1. Rack and Pinion type
2. Power Steering
3. Others
