

**SINGLE CYLINDER TWO STROKE  
PETROL ENGINE TEST RIG**

MODEL: HMT01

**FEATURES**

- Compact, comprehensive, sturdy design
- Easy and versatile operation
- Choice of dynamometers

**DESCRIPTION**

The system is designed for students to conduct experiments and study the performance of petrol engines. The engine and dynamometer are mounted on a bedplate. The rig facilitates easy measurement of temperatures, fuel consumption, air consumption, brake-power and engine speed. Testing can be carried out at various loads.

## INSTRUCTION MANUAL

---

Self-explanatory operating manuals are provided with each system. Detailed theory as well as practical exercises is also included in the manual

## LIST OF EXPERIMENT

---

1. To determine Brake Power
2. To determine engine volumetric efficiency
3. To determine engine brake thermal efficiency
4. To determine engine specific fuel consumption
5. Complete energy balance using exhaust gas calorimeter.
6. Determining air/ fuel ratios

## COMPONENTS

---

1. Petrol Engine
2. Dynamometer
3. Multi-point Digital Temperature Indicator
4. Fuel Consumption Measuring Unit
5. Tachometer
6. Air Flow Measuring Unit
7. Calorimeter Cooling water flow measurement
8. Control Panel
9. Exhaust gas calorimeter

## OPTIONAL ADDITIONAL

---

1. Digital indicator for fuel consumption, volumetric type
2. Digital indicator for fuel consumption, gravimetric type
3. Digital indicator for air flow measurement
4. Digital indicator for Load
5. I.C. Engine components cut away model board.
6. Water supply arrangement, consisting of sump tank, pump and piping.  
(Required if hydraulic dynamometer or Eddy Current dynamometer is selected)

*Note: Details of attachments can be made available on request.*

## SERVICES REQUIRED

---

1. Water supply and drainage arrangement
2. Electric supply
3. Fuel for engine
