

FOUR CYLINDER FOUR STROKE PETROL ENGINE TEST RIG **MODEL: HMT02**

FEATURES

- Compact, comprehensive, sturdy design
- Easy and versatile operation
- Choice of dynamometers

DESCRIPTION

The system is designed for students-to conduct experiments and study the performance of petrol engines. The engine and dynamometer are mounted on a bedplate. The rig facilitates easy measurement of temperatures, fuel consumption, air consumption, brake-power and engine speed. Testing can be carried out at various loads.

INSTRUCTION MANUAL

Self-explanatory operating manuals are provided with each system. Detailed theory as well as practical exercises is also included in the manual

LIST OF EXPERIMENT

1. To determine Brake Power
2. To determine engine volumetric efficiency
3. To determine engine mechanical efficiency
4. To determine engine brake thermal efficiency
5. To determine engine specific fuel consumption
6. Complete energy balance using exhaust gas calorimeter.
7. Determining air/ fuel ratios
8. Morse Test

COMPONENTS

1. Petrol Engine
2. Dynamometer
3. Multi-point digital temperature indicator
4. Tachometer
5. Fuel Consumption Measuring Unit
6. Air Flow Measuring Unit
7. Control Panel
8. Exhaust gas calorimeter
9. Calorimeter Cooling water flow measurement
10. Battery

OPTIONAL ADDITIONAL

1. P- θ and P-V diagrams
2. Digital indicator for fuel consumption, volumetric type
3. Digital indicator for fuel consumption, gravimetric type
4. Digital indicator for air flow measurement
5. Digital indicator for Load
6. I.C. Engine components cut away model board meter is selected)
7. Battery charger

Note: Details of attachments can be made available on request.

SERVICES REQUIRED

1. Water supply and drainage arrangement
2. Electric supply
3. Fuel for engine

WEIGHT

1. 450 Kg

DIMENSIONS

- Control Panel: 720 mm X 510 mm X 1830 mm (Approx)
- Engine and Dynamometer: 1600 mm X 800 mm X 900 mm (Approx)
